PROJECTS

Trivago Clone 🔗

Trivago is a hotel search with an extensive price comparison. The prices shown come from numerous hotels and booking websites. This means that while users decide on trivago which hotel best suits their needs, the booking process itself is completed through the booking site.

Collaborative project developed along with three team members in 4 days.

Tech Stack: HTML, CSS, JAVASCRIPT, REACT, REDUX

Areas of responsibility:
- Developed the search-bar and all functionalities for the same.
- Built the whole filtering and sorting features in hotel comparison page.
- Worked on the hotel cards.

facebook Clone 🔗
Facebook is a leading social media platform across the globe. It has the ability to connect and share with the people you care about.

Collaborative project developed along with three team members in 5 days.

Tech Stack: HTML, CSS, JAVASCRIPT, REACT, REDUX, MONGODB

Areas of responsibility:
- Developed the whole user profile page and made it editable.
- Worked on the backend.
- Worked on the post card and post form.

Udemy Clone 🔗

An online education platform where students can buy the courses they like to learn from the top educators around the world and get certified.

Collaborative project developed along with two team members in 7 days.

Tech Stack: HTML,CSS,JAVASCRIPT

Areas of responsibility:
- Making plan for the day.
- Worked on landing page ,merged the pages.
- Worked on the add to cart functionalities and also designed cart page and applied features to it.
